

BUILDER EDITION - ASSIGNMENT FEEDBACK

Session 03 - String Surgery - Assignment S03_A01

Student: Aanya

Module 1 - Programming Foundations

Graded: 01 Aug 2026

Pass mark: 50/100

SCORE

78 / 100

Bonus not attempted

Good start - but incomplete

The parts you attempted are correct; this file looks like an early draft - Q5 is blank and it is a little disorganised.

78% - well above the 50% pass line

MARKS BREAKDOWN, QUESTION BY QUESTION

Q	What it tested	Level	Score	Feedback
Q1	Slicing a product code	EASY	16 / 16	'sugar' and '1KG' - correct slicing.
Q2	strip() + title()	MED	16 / 16	'Dettol Soap' - correct chaining of methods.
Q3	Reverse with[::-1] + input()	MED	16 / 16	Correct reverse of the entered word.
Q4	split() + len()	MED	16 / 16	List of 5 items and count 5 - correct.
Q5	(left blank)	MED	0 / 20	Not attempted - this is where most of the missing marks are. Go back and complete it.
Q6	Extra: indexing (P / T / len)	EASY	14 / 16	Correct index and len work, but it sits under a stray 'A01' heading - tidy the file so each question is clearly labelled.

WHAT YOU DID REALLY WELL

- ✓ Every slicing and method call you attempted is correct.
- ✓ Good chaining of `.strip().title()` in Q2 - that is the professional way.
- ✓ Correct use of the reverse trick `[::-1]`.

CODING PRACTICE - THE CRAFTSMAN'S CODE

- > This file mixes 'Questions from notes' and a stray 'A01' block - keep one clean, numbered file per assignment.
- > Your fuller string assignment (s03_a02) is much better organised - match that standard here.

WHERE TO IMPROVE

- Complete Q5 - it is currently empty and costs the most marks.
- Number every question clearly and delete leftover scratch blocks before submitting.

YOUR TARGET FOR THE NEXT SESSION **78 - the content is right, the completeness is not.** Finish Q5 and submit one tidy file. Your other string assignment shows you can do this easily.
