

BUILDER EDITION - ASSIGNMENT FEEDBACK

Session 03 - String Surgery - Assignment S03_A02

Student: Aanya

Module 1 - Programming Foundations

Graded: 01 Aug 2026

Pass mark: 50/100

SCORE

96 / 100

Bonus not attempted

Excellent - full and correct

Ten questions, all working, including the tricky record-parsing question. This is exactly the standard we want.

96% - well above the 50% pass line

MARKS BREAKDOWN, QUESTION BY QUESTION

Q	What it tested	Level	Score	Feedback
Q1	Index + len	EASY	10 / 10	P, T, 11 - correct, with helpful comments.
Q2	Slicing + reverse	MED	10 / 10	PRAKSH / MART / reversed - all correct.
Q3	Slice into name + weight	MED	9 / 10	Correct. You could store the slice indices in named variables for readability.
Q4	strip/title/upper/replace	MED	10 / 10	Clean chaining and the replace('-', ' ') - correct.
Q5	in / find / count	MED	10 / 10	True, 7, 2 - all correct.
Q6	split() + len()	EASY	10 / 10	Correct list and count.
Q7	upper()	EASY	9 / 10	Correct - stored the result in a variable, good.
Q8	strip + split + title	MED	9 / 10	Correct. Note 'Rice-Basmati-5Kg' title-cases each part - good observation to make.
Q9	Record parsing (slices + checks)	HARD	10 / 10	Code PM1023, Name 'Sugar 1kg', price 42, reversed code, PM check - all correct. This is the hardest one and you nailed it.
Q10	join() + f-string :.2f	MED	9 / 10	Offers joined and 'Rs 12.50' formatted correctly - a nice preview of Session 4.

WHAT YOU DID REALLY WELL

- ✓ You parsed a structured record (Q9) correctly with slicing - that is genuine data-cleaning skill.
- ✓ Consistent use of variables to hold intermediate results - very readable.
- ✓ You are already formatting money with `:.2f` before we formally covered it.

CODING PRACTICE - THE CRAFTSMAN'S CODE

- > Excellent structure – clear numbered questions and helpful comments throughout.
- > One refinement: for slices like `record[7:16]`, a named variable or comment explaining the positions helps future-you.

WHERE TO IMPROVE

- Keep this exact standard – this is what a submitted assignment should look like.

YOUR TARGET FOR THE NEXT SESSION **96 - superb.** Your string handling is genuinely strong. Carry this same tidy, well-commented style into Pandas in Stage 2, where these skills scale to whole columns of data.
